DETAILED ACTION

1. This office action is in response to communication filed on 11/02/05. Applicant elects claims 1 – 11 for examination, and cancels non-elected claims 12 – 21 without traverse.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

3. Claims 1 – 11 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claim 1, in addition to other elements in the claim, prior art considered individual or in combination, fails to fairly show or suggest a device comprising: current level detector is configured to produce an output current equal to an input current, and a logic level that tracks changes in the input current; and a voltage generator is configured to produced an output voltage in response to both the logic level and desired temperature input; wherein the output approximates the voltage drop across a diode passing the input current at a temperature corresponding to the desired temperature input data.
